

There is lots of different dietary and nutritional advice out there. However, dietitians are the only qualified health professionals that assess, diagnose and treat diet and nutrition problems.

This Fact Sheet will help you understand what a dietitian is, what they do, who can see one, how to contact one and the qualifications needed to become one.

## What is a dietitian?

A dietitian is a degree-qualified health professional who:

- helps to promote nutritional well-being, treat disease and prevent nutrition-related problems
- provides practical, safe advice, based on current scientific evidence
- holds the only legally-recognised graduate qualification in nutrition and dietetics in the UK.

Only dietitians registered with the Health Professions Council (HPC) can use the legally protected title 'dietitian'.

Dietitians are the only nutrition professionals to be regulated by law and governed by an ethical code, to ensure that they always work to the highest standard.

## What do dietitians do?

- Translate nutrition science into understandable, practical information about food, allowing people to make appropriate lifestyle and food choices
- Treat a range of medical conditions with dietary therapy, specially tailored to each individual.

- Advise on healthy eating for all ages, races, cultures and social groups.
- Conduct research relating to health, diet and nutrition.
- Write and provide comment for the media.
- Advise industry and government.
- Give talks and lectures to health professionals and the public.
- Teach in higher education.

## Who can see a dietitian?

You can see a dietitian if you have been diagnosed with a medical condition or have concerns with any of the areas below:

- Diabetes
- Food allergy and intolerance
- Gastroenterology (digestive system)
- Heart and Thoracic (chest)
- HIV/AIDS
- Mental Health
- Obesity
- Oncology (cancer)
- Renal (kidneys)

## What areas do dietitians work in?

- Hospitals
- The community
- Research
- Public relations and media
- Health related agencies
- Food and pharmaceutical industries
- Education
- Sport and leisure
- Private health care
- Management
- Freelance

“ Being a freelance dietitian allows me to work the hours I choose and see people from all walks of life. **BDA member** ”

## How can you access a dietitian?

Most people will be able to see a dietitian within the NHS after being referred by an NHS GP, other doctor, health visitor or health professional. You can also self-refer – contact your local hospital nutrition and dietetics team to see if this is something they offer. Consultations with dietitians within the NHS are free.

Alternatively if you wish to see a dietitian who practices privately or 'freelance', you can search online for a dietitian near you at the Freelance Dietitians website [www.freelancedietitians.org/](http://www.freelancedietitians.org/) which is run by the BDA's Freelance Dietitian Group.

## How can I train to be a dietitian?

There are two ways to qualify as a dietitian:

- completion of a relevant degree
- completion of a postgraduate qualification.

All courses include periods of practical training in hospital and community settings, normally local to the university you are studying at.

The entry requirements for undergraduate degree courses vary, but you will normally be expected to have obtained A level passes (or Scottish/Irish equivalent) in two or three science subjects, including Biology and preferably Chemistry.

You should have Mathematics and English to GCSE (or Scottish/Irish equivalent) standard. A good command of spoken and written English is essential. Access courses in science and BTEC science qualifications may also be acceptable. You will also need to undergo an enhanced CRB check and occupational health screening. Remember that each application is considered on its

own merit. Postgraduate qualifications can be taken at several universities. Normally, applicants for these courses will have successfully completed an honours degree course which contains an acceptable level of Human Physiology and Biochemistry.

For a list of universities offering all dietetic courses visit the BDA website at: [www.bda.uk.com/edpostgrad.html](http://www.bda.uk.com/edpostgrad.html) or UCAS at: [www.ucas.ac.uk](http://www.ucas.ac.uk)

## The British Dietetic Association (BDA)

The BDA, founded in 1936, is the professional association for dietitians in Great Britain and Northern Ireland. It is the nation's largest organisation of food and nutrition professionals with over 6,000 members.

Although the BDA is for dietitians, our website [www.bda.uk.com](http://www.bda.uk.com) does provide some information for the general public, including access to relevant publications, including other Food Fact Sheets on diet and health.

Also have a look at our consumer websites [www.bdaweightwise.com](http://www.bdaweightwise.com) and [www.teenweightwise.com](http://www.teenweightwise.com) which offer responsible and reliable information based on scientific evidence along with practical advice on weight management, tools to motivate you and achieve success and independent reviews of popular diets.

This Factsheet is a public service of The British Dietetic Association (BDA) intended for information only. If you need to see a dietitian, visit your GP for a referral or: [www.freelancedietitians.org](http://www.freelancedietitians.org) for a private dietitian. To check your dietitian is registered check [www.hpc-uk.org](http://www.hpc-uk.org)
