Phosphorus	mg	26	44
Magnesium	mg	6.8	5.3
Iron	mg	0.7	0.64
Zinc	mg	0.7	0.6
α-linolenic acid (ALA)	mg	65	42
Docosahexaenoic acid (DHA)	mg	-	7.1
Linoleic acid (LA)	mg	536	520
Arachidonic acid (AA)	mg	-	12.3
Osmolality	mOsm/kg H ₂ O	240	230
		New SMA PRO Anti-Reflux	SMA Staydown
Formats available		800 g tin	900 g tin

IMPORTANT NOTICE: The World Health Organisation (WHO) has recommended that pregnant women and new mothers be informed on the benefits and superiority of breastfeeding – in particular the fact that it provides the best nutrition and protection from illness for babies. Mothers should be given guidance on the preparation for, and maintenance of, lactation, with special emphasis on the importance of a well-balanced diet both during pregnancy and after delivery. Unnecessary introduction of partial bottle-feeding or other foods and drinks should be discouraged since it will have a negative effect on breastfeeding. Similarly, mothers should be warned of the difficulty of reversing a decision not to breastfeed. Before advising a mother to use an infant formula, she should be advised of the social and financial implications of her decision: for example, if a baby is exclusively bottle-fed, more than one can (400 g) per week will be needed, so the family circumstances and costs should be kept in mind. Mothers should be reminded that breast milk is not only the best, but also the most economical food for babies. **This product must be used under medical supervision. SMA PRO Anti-Reflux** is a special formula intended for the dietary management of bottle-fed babies when significant reflux (regurgitation) is a problem. It is suitable as the sole source of nutrition up to 6 months of age, and in conjunction with solid food up to 12 months of age. If the baby's reflux does not improve within 2 weeks of starting **SMA PRO Anti-Reflux**, or if the baby fails to thrive, the family doctor should be consulted.
